

## RepaCoat CH - chemically resistant coatings

*These are average values and may vary, depending on volumes and ambient conditions.*

Product Group	Product Name	Product Number	Viscosity [mPas]	Max grain size in(µm)	Temperature resistance [up.. /up to..]	Field of application/Function
highly chemical resistant	C40	#2111	putty	40	-20°C +170°C	highly resistant against most aggressive media and wear resistant
light wear	C40	#2047	liquid [6000]	40	-20°C +170°C	
	C40	#2110	liquid [6000]	40	-20°C +170°C
